RE: Matthiessen and Hegeler
Zinc Company Site
La Salle, Illinois
NPL-U36-2-6-R5

Dear Coordinator,

I strongly encourage the placement of the M and H site on the "Superfund" list for immediate attention. I am concerned about the effects of the contamination upon the surrounding neighborhood and the Little Vermilion River. I am worried that it will eventually affect La Salle's municipal water supply which draws from shallow wells near the river. There are also plans for a recreational greenway along the Little Vermilion and the presence of the site presents a safety concern.

Sincerely,
